

Wellington Airport South Terminal Building | Hawkins Construction | Warren & Mahoney

WE LOVE WORKING WITH PEOPLE WHO ARE GOING PLACES

Our building envelopes are engineered to provide a comfortable, quiet, weather-tight environment, managing light, thermal efficiency and comfort – all whilst minimising risk for contractor and client.

Select a façade designer for your next project that can engineer a custom-made solution. Specify the Thermosash range of Unitised™ curtainwall, commercial windows, shop fronts, sliding doors, bespoke external elements and seamless integration of seismic design. We believe it makes buildings better, saves you time and reduces your risk – it just makes more sense.

Locally testing, manufacturing, installing and standing behind our façade systems since 1973.

Search this project on our website. Keyword - South Terminal.
