

## WE'RE NOT KNOWN FOR SHADY FAÇADE SOLUTIONS... ...BUT WE DO THEM ALL THE TIME.

While we're known for high-performing commercial window and curtain wall façades, we regularly engineer our bespoke unitised solutions to include shade device systems. Not only do they provide passive light and solar control to improve occupant comfort, they also reinforce the architect's aesthetic – we don't think that's too shady at all.

Our prefabricated unitised manufacturing makes buildings better, speeds up construction enclosure and reduces your risk – it just makes more sense. So make sure you select a façade contractor that can specifically engineer the façade and glass solution to meet your needs.

**Locally testing, manufacturing and installing  
(sometimes shady) façade systems since 1973.**
