

Tip Top Building - Auckland

## NEW TIP TOP FAÇADE TRUMPETED

When we were called on to reclad the curtain wall of the iconic Tip Top building to manage weathering, acoustics, fire, smoke, compliance certification and installation logistics - we met the challenge - and we didn't melt under the pressure!

"The Thermosash unitized system delivered the clean modernized look we needed. The system allows for a quick installation period, an important factor for us as project managers, as the office behind the new facade installation remained operational." Aaron Trembath, Architectural Director at Peter Swan Ltd.

Thermosash prefabricated unitised façade solutions increase on site productivity, reduce onsite duration and allow buildings to get closed in faster.
